

Quick start for 2-Minute PDF Designer

1. Download the latest version of the *2-Minute PDF Designer*.
2. Install *2-Minute PDF Designer* by clicking on the downloaded file.
3. Go to **Start > Programs > Rarefind > 2-Minute PDF Designer** > click on 2-Minute PDF Designer.
4. Design your template using the designer.
5. Save the template as an XML file.
6. Open Visual Studio .Net and create a new **Windows Application** project.
7. Add ***RareFind.PDFDocumentCreation*** to the *using* section.
8. Copy the code given below inside the form load function

C#

```
// Create an Object of DocumentData.
DocumentData data = new DocumentData();

// Load the saved xml file by giving its path.
// File path is for demonstration only.
data.Load("E:\\Invoice.xml");

// Select the format to export the document.
data.SelectedFormat =
RareFind.PDFDocumentCreation.DocumentFormats.PDF;

// Assign the license key you got when you purchased the product.
data.LicenseKey = "12345-12345-12345-12345-12345";

// Export the document.
Data.Export();
```

VB.Net

```
// Create an Object of DocumentData.
Dim data As DocumentData = New DocumentData()

// Load the saved xml file by giving its path.
// File path is for demonstration only.
data.Load("E:\\Invoice.xml")

// Select the format to export the document.
data.SelectedFormat =
RareFind.PDFDocumentCreation.DocumentFormats.PDF

// Assign the license key you got when you purchased the product.
data.LicenseKey = "12345-12345-12345-12345-12345"
```

```
// Export the document.
```

```
Data.Export()
```

9. Build your application by clicking *Build Application* in *Build* menu.
10. Run the application.

Files to Redistribute.

1. With your executable you need to ship RareFind.PDFDocumentCreation.dll.
2. You may deploy this software along with the software you develop on any number of desktop computers, ROYALTY FREE.
3. You may install and use the software for the purpose of developing server-based applications. In such a case, you must buy one server deployment license per server on which you deploy your software.
